

## INSTRUCTIONS FOR ADMINISTERING CHEMICALS

- With the jets on administer the following every night;
  - 2 Scoops of Oxysure
  - 5ml of Chlorine Granules
  - 3 Capfuls of Water Clarifier
- You must leave 5 mins between each application to allow chemicals to dissolve.
- Turn the jets off when finished and replace the lid.
- Avoid contact with the skin and wash hands after use.
- Administer the chemicals each night after use to keep the water clean and clear.
- Ensure the jets are on whilst adding chemicals to ensure they are distributed and circulated in the water. Allow jets to run for approx 15 mins.
- Please take care when administering chemicals especially in windy conditions to avoid any chemicals blowing into your face or eyes. If this should occur, rinse eyes immediately with fresh, clean water and seek medical advice.
- Never mix chemicals together in a container, always add separately.
- Only administer chemicals when bathing has ceased and never when the spa is in use.
- Do not use spa for at least two hours after administering chemicals.
